About me

> I am a creative collaborator. Leveraging my experience as a front-end developer and a focus on elegant design and user experiences, I see the gaps left open between disciplines and bring them into focus.

> I am a problem solver. I thrive on utilizing my peers' and my combined experience to produce creative, elegant solutions to difficult problems.

Experience

WeDidIt

Product Manager
Brooklyn, NY
July 2017 – November 2017

Working collaboratively with the development and executive stakeholders, we drive the site forward with new features, quality design, & infrastructure updates on a rapid, one week sprint cycle. Projects include product guides, redesigns, and membership tools.

Zerve

Software Developer
San Francisco, CA
February 2015 – July 2016

Developing new ideas and maintaining the website of the top activity booking and sales platform. Working with a small distributed team of developers & designers to prototype rapidly and deploy new features. Built a custom node.js build tool for a complex environment.

Boston Young Creatives

Lead & Organizer
Boston, MA
June 2012 – Present

A meetup.com group with over 1,400 members, 30+ attending each social meet up. The group's mission is to encourage conscious collaboration where creatives from every field are able to communicate clearly when working with each other professionally.

Partners+simons

Front-end Developer
Boston, MA
December 2013 – September 2014

My focus was on front-end, responsive web development. My responsibilities included coding HTML5, CSS3, and JavaScript. My cross-industry experience provided me the ability to work with other creatives to create a cohesive digital experience.

Scholastic Inc.

Front-end Developer
Watertown, MA
July 2012 – November 2013

With a focus on front end development, information visualization design, and document design, I assisted the Hosting & Operations and Enterprise Services departments. Working with engineers and management to put together visuals which would serve as a portal of information for external departments.

nSphere Inc.

Front-end Engineer
Boston, MA
July 2011 – March 2012

My primary position in this role was developing the UX for a new white-label local search feature. My responsibilities also included updating and building HTML products, branding, and building a new MVC based corporate website.

PullnotPush.com

Design and Development
Boston, MA
July 2010 – Sept. 2010

Working in a web startup in a mostly digital environment. The focus was on inbound digital marketing, email, and web pages. Hubspot Certified company.

Nuance Communications, Inc., Dragon NaturallySpeaking

Graphic Designer
Burlington, MA
Feb. 2010 – June 2010

A co-op position in the marketing department working with digital, physical, and multimedia marketing. My work was based around email marketing, data sheets, and video projects.
